

With Preventure, biometric screening is easy for your employees and easy for you.

And the numbers matter.

We are **Preventure.**

Over the last 25+ years, we've changed millions of lives at hundreds of diverse organizations. We improve employee health, reduce the cost of human resources, increase profitability, and—unlike any other company—we guarantee real results.

YOUR ENGAGEMENT MANAGER OVERSEES EVERY PART OF THE BIOMETRIC SCREENING PROCESS.

In as little as 15 minutes, biometric screenings provide vital information about your employees' overall health, helping to identify potential future health risks such as diabetes, high blood pressure, heart disease and more. Preventure's personalized approach gets great results, offering a range of options to meet your company's needs. And we handle everything, well in advance.

Onsite screening events

Planning

- We plan your event based on your completed planning sheet
- Obtain your approval and sign-off
- Secure event date 12 – 16 weeks in advance
- Send a customized site coordinator guide

Event management

- Participants sign up online or on paper
- Professional providers arrive 30 minutes in advance
- Single-station screenings take 10 – 15 minutes
- Participants receive immediate feedback about their health risks, along with quality educational materials

Post-event activities

- Preventure uploads data to your personalized portal and data warehouse
- You receive an aggregate risk summary for each event
- All participants receive a satisfaction survey

PREVENTURE BIOMETRICS PARTICIPANT SATISFACTION RATINGS

Fingerstick

- Quick, easy, less invasive
- Employees may appreciate the simplicity
- Considered slightly less accurate for cholesterol
- Less expensive

Venipuncture

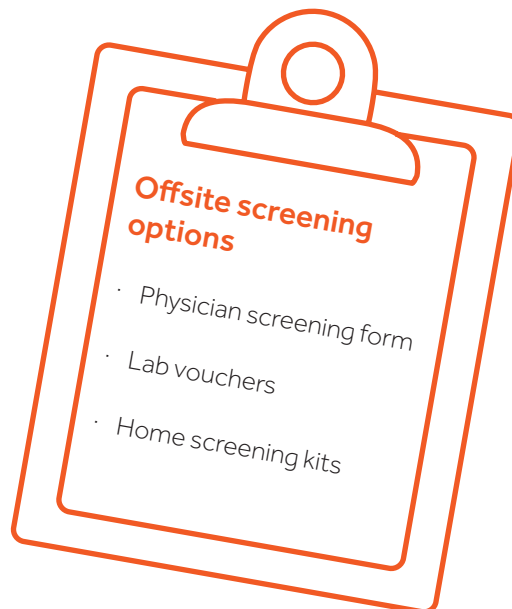

- Takes a bit more time, involves intravenous blood draw
- Employees may see this as more valuable
- The most accurate measure
- Slightly more expensive due to equipment and personnel required

What are the numbers?

Common measures collected include:

- Total cholesterol
- HDL, LDL, triglycerides, ratio
- Glucose
- Blood pressure
- BMI (measured height and weight)
- Waist circumference
- Body fat

Non-fasting includes above except LDL and triglycerides
